Powering enterprise communications
through integrated telephony solutions.

T3 Solutions for Hospitality

**Delivering Unique Hospitality Solutions for Advanced
Telephony Applications**

T3 Solutions for Hospitality

The hospitality industry has unique requirements when selecting a voicemail system for guests and staff. Guests expect hotel voicemail to behave like any other voicemail they use day-to-day, while hotels need to find a balance between managing the short-term nature of this service and providing staff with a fully-featured messaging system.

T3main's hospitality solution allows hotels to provide an affordable and cutting-edge voicemail system for their guests and staff. The T3main seamlessly integrates with a wide variety of Property Management Systems (PMS) and can work with any TDM or SIP-based PBX, supporting virtually any phone system. Hotels can further customize their offering by utilizing T3main's building blocks approach to add features such as unified messaging, automated attendant, speech recognition, speaker verification and voice transcription.

T3main Hospitality Features

The T3main supports the following hospitality features:

- Guests can set, modify and cancel their own wake up calls
- Guests can retrieve room messages from any phone on or off the property
- Guests can access voicemail and fax messages through a Web browser
- Front desk can retrieve new messages for a guest
- Front desk can retrieve messages for a guest that has checked out
- Staff has access to a fully-featured voicemail system

Technical Requirements

The T3main is a certified Guest Service System (GSS) partner with Control's Lodging Link® product. Hotels can connect to T3main voicemail through Lodging Link using RS232 communication port or through a network using UDP.

The T3main supports the following PMS features:

- Check In
- Check Out
- Room Move
- Room Swap
- Language

About T3 Telecom Software, Inc.

T3 Telecom Software offers an innovative and comprehensive telephony solution harnessing the best technologies in the telecommunications industry. A unique single-platform approach provides flexible voice and data capabilities to support a variety of location sizes, regional requirements and technology infrastructures.

The company's progressive building block approach allows customers to build a highly customized and configured telephony application that meets unique business requirements without in-depth knowledge of programming and telephony. T3 Telecom Software's suite of products includes next-generation unified messaging, speech recognition and voice verification capabilities, as well as traditional voice messaging, interactive voice response, fax, and automated attendant functionality.
